Transfer Factor LymPlus™

Specific Immune Support

Transfer Factor LymPlus™ provides the physician with a targeted formula developed to support the body's immune system. This uniquely formulated transfer factor is derived from chicken based transfer factor.

As with all targeted transfer factors, it is recommended the health care professional confirm the patient's condition with the appropriate lab tests which are available at a number of commercial labs (i.e. ImmunoSciences, Beverly Hills, CA) prior to administering the targeted transfer factor.

Another set of tests a health care professional may want to consider is the HEMEX Labs (Phoenix, AZ) hypercoag panel. According to their in-depth research, many patients blood is so thick that proper oxygenation of the brain and other tissues is subpar. Their unique testing diagnoses the problem and follow-up discussion with the lab often leads to a protocol for the treating physician to follow.

For more information on the immune system and transfer factor [Click here](#)

Suggested Use

As a dietary supplement, take on an empty stomach at breakfast or at bedtime or as directed by your health care professional:

Week 1: 1 capsule per day

Week 2 & beyond: 2 capsules per day

Individual should not eat for at least one hour after taking the product.

Cautions

Some individuals may experience flu-like symptoms when they first take the product. Most physicians recognize this as a normal reaction of any product developed to support the immune system. If these symptoms occur, they generally subside within two weeks. Sensitive individuals should start with one capsule per day for the first week; two capsules per day for the second week and thereafter. If individual misses a dose, he/she should not double the dose.

Storage

Product should be stored in a refrigerator with the lid tightly closed.

Product Code: CRN114
30 Day Supply

Researched Nutritionals' products are only available through health care professionals. More detailed information and purchasing is available on line for health care professionals who have registered and signed in: [Click here](#)
